

Bharatiya Vidya Bhavan's Mehta Vidyalaya, New Delhi

5th March, 2020

Dear Parent,

Greetings from Bharatiya Vidya Bhavans Mehta Vidyalaya.

I share it with concern that the Novel Coronavirus cases have been reported in Delhi also. Though much is not known about the disease dynamics, it is evident that there is human to human transmission. Hence preventive measures became crucial to stop spread of this disease.

Effective steps are being taken by the school to maintain hygiene in school premises including spraying of disinfectant/fumigation of the entire campus.

The concern has to be addressed through parent-school partnership which involves us to work together both in school and at home. Following important measures are shared to avoid spread of virus among school children :

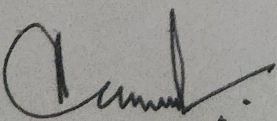

- Any child who is suffering from respiratory issues, influenza, cold, cough, fever or any other unexplained illness should refrain from attending the school with due intimation to the class teacher.
- Exam/test if any will be rescheduled accordingly depending upon the class he/she is in.
- The school has uploaded NDMC/Ministry of Health & family Welfare advisory of precautionary measures on school website as well as snap home work app. Please go through it and follow guidelines.
- Avoid going to public/crowded places unless it is an emergency.
- Clean hands frequently with soap and water and alcohol based hand rub.
- Send a small bottle of sanitizer in school bag for personal use of your ward.
- Drink plenty of water/liquids and eat nutritious food.
- Must consult a doctor in case of suspected influenza like illness and segregate the person infected with it.

Bharatiya Vidya Bhavan is a family school that will support you in all eventualities. Please feel free to contact me at principalmentavidyalaya@gmail.com to address any concern that you may have.

"Prevention is always better than cure"

Please do not panic and keep up the faith !!

With regards

Dr. Anju Tandon
Principal

Ministry of Health & Family Welfare
Government of India

Novel Coronavirus (COVID19)

Basic Protective Measures For All

Help us to
help you

- > Wash your hands frequently
- > Maintain social distancing
- > Avoid touching your eyes, nose and mouth
- > Practice respiratory hygiene by covering your mouth and nose with your bent elbow or tissue when you cough or sneeze
- > If you have fever, cough and difficulty breathing, seek medical care at the earliest
- > Stay informed and follow the advice given by your healthcare provider
